Embassy of India
Dakar

RFP No. DAK/GEN/551/01/2020   **Dated:- 21.04.2020**

CORRIGENDUM

Please refer to Tender ID No. 2020_MEA_529923_1 dated 01.04.2020 published on CPP Portal by Embassy of India, Dakar for Redevelopment and Maintenance of Website of EOI, Dakar and migration on Virtual private Cloud Infrastructure. This corrigendum is being issued to incorporate the following changes in the tender document based on the clarifications received from various stakeholders:-

1) Due to ongoing pandemic situation, the purchase/technical committee has decided for extension of following dates, new dates are as below:-

Clarification end date	06.05.2020	1700 hrs
Bid Submission end date	07.05.2020	1500 hrs
Bid opening date	08.05.2020	1530 hrs

2) Due to ongoing pandemic situation, the purchase/technical committee has decided for partial modification of Para 5(C) of tender document. **The bids can now be submitted through E-mail in the form of Docx. or pdf. password protected documents. The password for the documents has to submitted in a separate mail.**

3) Page No 8, Point No-6, under section 'Minimum Eligibility Criteria', it is mentioned that "The bidder should have completed at least 2-3 orders for website development and maintenance for Indian missions during the past five years i.e. 2014 – 2019 with India missions in abroad ". **The term Indian missions above may be substituted with Indian government ministry/department.**

4) The heading of the document itself has two parts as mentioned below. Redevelopment and Maintenance of Website of Embassy of India, Dakar and Migration of Embassy website to VPS. Does this mean that we have two goals? One is to redesign the Website of Embassy of India, Dakar and the second is the Migration of Embassy website to VPS. If so the website https://embassyofindiadakar.gov.in/ comes under which category? Is this being to be redesigned or this is the one to be migrated to VPS? **Yes, there are two goals that need to be fulfilled one is redevelopment and other is Migration to VPS. Though Embassy's website is already migrated to VPS, selected vendor may continue with same VPS or may migrate to new VPS. Hosting of website is annual affair, which needs to be undertaken by the selected vendor.**

5) In the objectives (A. Website Management) it is mentioned as "Redesign and development of existing websites of Embassy of India, Dakar". Does it mean that there are multiple websites to be redesigned/developed? If so, which all are they? **Embassy maintains only one website, which needs to be redesigned and updated.**

6) Section under Introduction Objectives -> (B) Website Hosting HTTP/SSL for hosting of the website Do we need to use the SSL certificates from any certain authority (free or paid?) or we can use it from any service provider? **Paid version: It is recommended to use services of paid/authentic/genuine service provider.**

7) Section under Introduction Objectives -> (B) Website Hosting Website hosting preferably to be hosted on GI Cloud. Does the GI provide us with a VPS machine and do we need to install the required software or is that be already installed from GI side where we can host the website? Or we can host the website in any VPS in India which is selected by us? **As the document says Website hosting preferably to be hosted on GI Cloud and already stated in point (3) above.**

8) 2.1 Scope of Work (j) Develop and application through which Embassy is able to upload contents remotely" Brief explanation is required for this point. **Mission wishes to upload content as and when required by itself without the support of website developer.**

9) 2.1.2 Website Maintenance A. Upgrade/update content and structure of Embassy's current website. Does it mean that to update the content of the existing website https://embassyofindiadakar.gov.in/) or the new one which is to be created? Do we need to make changes in the existing website on the above URL which seerest is finems to be an old one? **The URL for Embassy website will remain same whereas existing website content needs to be update as and when demanded by the Embassy.**

10) 2.1.4 Database management (b) Maintain registered Indian citizen database Brief explanation is required for this point. Is there any such existing database or any website related to it where we will get the data or we need to implement the functionality to allow the Indian citizens to register here and store their data in our website/database? Or Is it a separate project which is to be done?: **It is not a separate project, this is a part of website management. A link needs to be created for registration of Indian nationals and that database is to be readily available with Mission. Mission do have some database which needs to be merged with futuristic data.**

11) 2.1.4 Database management (b) Content archiving in a local server for periodic review for the content up on need from missions Brief explanation is required for this point. Does this mean that the database is to be imported in a local machine located at Embassy office? **Database need not be imported in a local machine located at Embassy. It should be available at local server created by the vendor.**

12) While clicking on the link "Whats New" in the homepage it redirects us to a subdomain https://asp.embassyofindiadakar.gov.in/eoia/aWn_list.asp which   seems as another website. Do we need to take care of such subdomain websites too? If so, how many such websites are to be taken care? **This subdomain to be submerged into the main website.**

The other conditions of the tender document remains same.
